Land Surveyor in Training/Survey Technologist – Greater Victoria

Polaris Land Surveying Inc. is looking for an experienced survey/geomatics technologist to join our team. Polaris is a progressive firm with projects ranging from simple one lot topographic plans, through to large scale strata and air space developments. Except for field work, the Polaris model allows team members to work virtually, from any location and a work a flexible schedule.

Polaris is looking for a Land Surveyor in Training or an experienced Geomatics/Survey Technologist with some or all of the following skillsets:

- Field survey including robotic total station and GNSS.
- Survey calculations such as least squares adjustments, volumes, alignments etc.;
- Processing conventional and GNSS survey data;
- Working with point clouds;
- Preparing survey files to assist with field work;
- Boundary resolution;
- Checking survey data;
- Plan checking;
- Land Title and Crown Land research;
- Ability to communicate with fellow team members and project manager.
- Scanner experience

If you have all or some of these skills and you are self-motivated, enjoy working in a dynamic and progressive environment where quality of work and client service are at the forefront, Polaris is the team you have been looking for.

The ideal candidate for this role is located in Greater Victoria or the southern Gulf Islands and is looking for a blend of field work and 'office' work. This position is designed for flexible lifestyles, with the successful candidate working from a home office. If you want to skip the commute and have more free time, please contact Brent Taylor at btaylor@plsi.ca to learn more about this opportunity.
